Basalt Gray

Eggshell

Mesquite Brown

Moroccan Buff

Cocoa Brown

Terra Cotta

Cortez Red

Bermuda Shell

El Rancho Red

Ireland

Atlantic Gray

Mesa Tan

Toffee

Stone Gray

Durango Tan

PRODUCT NOTE: QC CEMTINT can be used over QC COLOR HARDENER*, QC COLORTECH - ETTM* and QC COLORTECHTM*

LIMITATIONS: The 15 Natural and 15 Exotic QC CEMTINT standard colors are shown applied to uncolored (gray) concrete. However, QC CEMTINT produces unique effects to each individual concrete substrate and may differ significantly from the colors shown on this chart. QC CEMTINT will produce a wide range of finished colors depending on many factors including, but not limited to, finishing techniques, mix designs, curing practices, base color, surface porosity, age and condition in existing concrete slabs, and sealer use. There is an element of uncertainty and unpredictability inherent in the use and final appearance of QC CEMTINT, including uneven, mottled or translucent effects. Also, concrete that has been extremely hard-troweled may be difficult to stain. † **Sunflower and Serengeti Sun are not recommended for exterior use.**

IMPORTANT NOTE – Before applying product to new or existing concrete, it is strongly recommended QC CEMTINT is tested in an inconspicuous area on the actual surface for desired results. Refer to the *QC CEMTINT Product Information Bulletin* for additional information and product limitations.

QC CEMENTINT *

PENETRATING STAIN

COLOR THAT PERFORMS – QC CEMENTINT is a permanent, penetrating, water-based stain available in 30 standard colors to transform residential, commercial or municipal concrete paving into an enchanting, beautiful, and vibrant terrain.

COLOR THAT IS UNIQUE – The rich but variegated finishes characteristic of QC CEMENTINT can be achieved when choosing from the 15 natural or 15 exotic shades. To make the next project just right, technicians from the QC CONSTRUCTION PRODUCTS color lab are available to create a custom color upon request.

COLOR THAT LASTS – QC CEMENTINT works by penetrating and reacting with mineral compounds and/or siliceous materials in concrete to create a translucent or marbled appearance (on the surface below). QC CEMENTINT permeates the pores of the substrate leaving no film or coating to be worn away.

PRODUCT NOTES

- QC CEMENTINT is packaged in 1- and 5-gallon units (3.8- and 18.9-liter units).
- QC CEMENTINT is available in 30 standard colors or an endless variety of custom colors.
- This product is packaged in a two-part system: 1) QC CEMENTINT clear liquid pack. 2) QC CEMENTINT liquid color pack. The clear liquid and color tint pack are combined at time of use. Please refer to the QC CEMENTINT Product Information Bulletin for proper mixing instructions.
- QC CEMENTINT cannot be diluted, but can be applied over or under our signature reactive stain, QC PATINA STAIN*, to achieve hybrid color effects.
- Surfaces should be prepared to meet International Concrete Repair Institutes (ICRI) surface profile #1.
- Once mixed, the product should be used within 14 days. Always mix clear liquid and liquid tint pack before using QC CEMENTINT.
- QC CEMENTINT coverage ranges from 400-600 square feet per gallon, per coat. Actual coverage rates may vary depending on texture, porosity, age and condition of the concrete, application methods and other local conditions. Please refer to the QC CEMENTINT Product Information Bulletin for product and application details.
 - Recommended Sealers:
 - QC SURPRO (SB or WB)*
 - QC CEMSEAL*
 - QC PERMASEAL*
 - QC ULTRA SEAL*
 - QC SOLVENT SEAL 18*
 - QC SOLVENT SEAL 27*
 - QC SOLVENT SEAL VOC III*
 - Top Coat Sealers:
 - QC INTERIOR FLOOR FINISH*
 - QC NATURAL BEAUTY*

*PLEASE REFER TO THE CORRESPONDING PRODUCT INFORMATION BULLETINS FOR TECHNICAL AND APPLICATION DATA.
